

Example Math

This is a tiny LaTeX example for the workshop.

An inline expression looks like $y = ax + b$.

A displayed equation looks like

$$y = \alpha + \beta x + \varepsilon.$$

Here is a short optimization problem:

$$\max_{c_t, a_{t+1}} u(c_t) + \beta V(a_{t+1})$$

subject to

$$c_t + a_{t+1} = (1 + r)a_t + w_t.$$
